

May 1, 2020

Greetings Pathways Families,

We hope that you and your loved ones are staying healthy indoors! We wanted to remind you that Learning Period 10 is in progress. All students should be working to complete at least five units by the end of the period. As you know, distance learning will continue through the remainder of the school year. Below you'll find some additional reminders and announcements-

All Pathways students have been provided a gmail account. Parents and guardians, please confirm that your child knows how to log on. Gmail is an important tool for us to keep in contact with them. This is also where they will receive and access invitations to their daily scheduled appointments with teachers.

We are still available to support students should they need to borrow a Chromebook. If this applies to you, please contact your teacher. Also, report card pick-up & parent/teacher conferences are taking place this week. You should expect communication from your child's teacher about their progress, graduation calculators, and student guides.

Please note that Pathways is continuing to enroll new students. Accommodations can be made for remote orientation. Reach out to any campus for inquiries! You may need to leave a voicemail, but rest assured all messages are being directed to the Assistant Principal who will arrange for a return call.

Thank you again for your continued support and engagement. We honored to have you as a part of the Pathways family!

Sincerely,

Pathways In Education
